

TEAMS Videos and Documentation

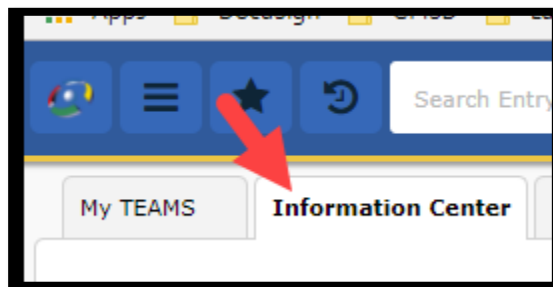

This guide will demonstrate how to find helpful tutorial videos and how-to-guide documentation in the TEAMS software.

On the Work Bench (blue bar across the top of the screen), there is a Tools button that will provide links to a video that is helpful to that page.

If there is a video available that is relevant to the page, the option will appear here.

The Tools Button can also be used to access the TEAMS Information Center, which contains PDF guides for all aspects of the software. The Information Center can also be found on the Information Center tab of the home page.

These guides are found by clicking on the icon for Documentation.
